

# Chromatin Day

SFB 1064

27. July 2017

Biomedical Center

Small Lecture Hall

| From                          | To           | Project              | Speaker                   | Title   |
|-------------------------------|--------------|----------------------|---------------------------|---|
| 09:00                         | 09:10        | General              | Peter Becker              | Welcome   |
| <b>Chair: Boris Pfander</b>   |              |                      |                           |   |
| 09:10                         | 09:30        | A04 / Korber         | Philipp Korber            | Sleeping beauties: <i>S. pombe</i> transcription start sites usually suppressed by chromatin                                      |
| 09:30                         | 09:50        | A06 / Hopfner        | Marianne Schwarz          | The INO80 chromatin remodeler from the nucleosome's perspective   |
| 09:50                         | 10:10        | A07 / Müller-Planitz | Ashish Singh              | Mechanism and regulation of ISWI chromatin remodelers in yeast  |
| 10:10                         | 10:30        | A19 / Smolle         | Anne Fritsch              | Can metabolic enzymes regulate ISWI remodeler function?   |
| 10:30                         | 10:50        | A03 Ladurner         | Magdalena Murawska        | Silent FACTs - dissecting functions of the essential histone chaperone in heterochromatin maintenance                             |
| <b>10:50</b>                  | <b>11:15</b> | <b>BREAK</b>         |                           |   |
| <b>Chair: Michaela Smolle</b> |              |                      |                           |   |
| 11:15                         | 11:25        | Gender Programme     | Elizabeth Schröder-Reiter |   |
| 11:25                         | 11:45        | A23 / Pfander        | Susanne Bantle            | Local and global checkpoint signalling on damaged chromatin   |
| 11:45                         | 12:05        | A02 / Gaul           | Alessio Renna             | Nucleosomes are not all the same  |
| 12:05                         | 12:25        | A16 / Imhof          | Andreas Schmidt           | Proteome wide analysis of lysine methylation  |
| 12:25                         | 12:45        | A01 / Becker         | Sandro Baldi              | Site-specific nucleosome phasing by the chromatin remodeler CHRAC/ACF: <i>in vivo</i> analysis and <i>in vitro</i> reconstitution |
| 12:45                         | 13:05        | A08 / Eick           | Nilay Shah                | Tyrosine-1 of mammalian RNA polymerase II CTD regulates global termination of gene transcription                                  |
| <b>13:05</b>                  | <b>14:05</b> | <b>LUNCH</b>         |                           |   |
| <b>Chair: Sigurd Braun</b>    |              |                      |                           |   |
| 14:05                         | 14:25        | A21 / Uhlenhaut      | Fabiana Quagliarini       | Circadian and metabolic Glucocorticoid Receptor cistromes   |
| 14:25                         | 14:45        | A20 / Schneider      | Ben Foster                | The UBL domain of UHRF1 is critically involved in stimulating its E3-ubiquitin ligase activity towards chromatin                  |
| 14:45                         | 15:05        | A17 / Leonhardt      | Weihua Qin                | Role and Regulation of HP1β in Pluripotency   |
| 15:05                         | 15:25        | A22 / Bultmann       | Christopher Mulholland    | Dissecting the catalytic and non-catalytic functions of Tet1 during the transition from naive to primed pluripotency              |
| 15:25                         | 15:45        | A15 / Müller         | Sigrun Schmähling         | Regulation and function of the histone methyltransferase Ash1   |
| <b>15:45</b>                  | <b>16:05</b> | <b>BREAK</b>         |                           |   |

| <b>Chair: Henriette Uhlenhaut</b> |                                     |                      |                      |  |
|-----------------------------------|-------------------------------------|----------------------|----------------------|--|
| 16:05                             | 16:25                               | A12 / Rupp           | Alessandro Angerilli | Xenopus Epidermal Organoids detail the impact of Suv4-20h methyltransferases on skin differentiation |
| 16:25                             | 16:45                               | A24 / Torres-Padilla | Adam Burton          | Heterochromatin remodelling is necessary for preimplantation development                             |
| 16:45                             | 17:05                               | A25 / Braun          | Thomas van Emden     | Telomere sequence dependent function of Shelterin in nucleosome maintenance and genome stability     |
