

Numbers indicate assigned location in poster exhibition.

6th International Munich Chromatin Symposium, October 9-11, 2024

Araujo Hall, Nathalia	Histone chaperone DAXX regulates immune response and microbiota-crosstalk in the colon	1
Bertin, Marco	Dynamic X-chromosomal reactivation enhances female brain resilience.....	2
Beşkardeş, Sude	Interrogation of enhancer-promoter interactions using massively parallel reporter assay	3
Bhoi, Anupam	Conformational Dynamics of the ISWI nucleosome remodelling enzyme	4
Bozdag, Beyza	Deciphering the Regulation of Histone Post-Translational Modifications Using <i>Drosophila Melanogaster</i> Embryo Extracts	5
Bright, Ann Rose	Nfib regulates progenitor competence in maturation of GABAergic neurons.	6
Bünker, Johanna	VPS72 in nuclear envelope reformation	7
Cantone, Irene	Understanding Chromatin-mediated Epigenetic regulation of Sex Bias in autoimmunity by X chromosome inactivation	8
Cepowska, Emilia	Unraveling the Role of LRWD1 (ORCA) in Spatiotemporal Control of DNA Replication Dynamics	9
Cernilogar, Filippo	Determinants for chromatin accessibility upon transcription factor binding	10
Colombo, Lara	Comparison of 3D genome structure between neuronal and clinically accessible tissues.....	11
D'Annunzio, Sarah	Chromatin condensates tune nuclear mechanosensing in Kabuki Syndrome by constraining cGAS activation.....	12
de Luca, Kim	Genome-wide profiling of DNA repair proteins identifies higher-order coordination in single cells	13
Deiser, Anja	How does resection overcome the nucleosome barrier during DSB repair?	14
Dvoretzkova, Elena	Dual role of the transcription factor Sp9 in mouse forebrain inhibitory neuron development	15
Einsiedel, Anna	Dynamic Visualisation of X Chromosome Inactivation Erosion in Human iPSC.	16
Estibariz, Iratxe	Deciphering the role of One Carbon Metabolism in heterochromatin regulation	17
Geller, Merle	Full function of SAMD1 on chromatin requires both DNA binding and protein polymerization.....	18
Gilardino, Viola	Epigenetic Regulation of R-Loop Homeostasis: Role of the <i>Drosophila</i> JASPer/JIL-1 Complex and MLE Helicase	19
Girvan, Paul	Nucleosome flipping drives selectivity and processivity of histone exchange by SWR1 complex.....	20
Gkountromichos, Fotios	Exploring the role of roX RNA in chromosome binding of the <i>Drosophila</i> Dosage Compensation Complex <i>in vivo</i>	21
Greulich, Franziska	BRG1 and glucocorticoids – more than gene activation.....	22

Numbers indicate assigned location in poster exhibition.

6th International Munich Chromatin Symposium, October 9-11, 2024

Hameed, Hadiya Abdul	Molecular conditions for isotropic to nematic phase formation of lamin proteins in nuclear lamina assembly	23
Hanout, Wessal	Endonuclease and beyond: The interplay between RAG1 and chromatin and its implication on V(D)J recombination control	24
Huber, Theresa	The IRF2BP2 corepressor complex cooperates with the ATF7/JDP2 heterodimer to drive AML.....	25
Jahnen, Nora	Targeting Chromatin Remodeling: Assessing the Role of small molecules in Modulating BAZ2A Function	26
Jurriens, Daphne	Single molecule biology: unravelling the mechanisms underlying chromatin organization and transcription.....	27
Kars, Gizem	DOMINO Nucleosome Remodeling ATPase in Unfolded Protein Response	28
Kolesnikova, Olga	Molecular basis for specific H4K16 acetylation by the Drosophila MOF/MSL complex	29
Koot, Daniëlle	Determining STAT1 targets following chromosomal instability.....	30
Lenz, Jonathan	The RNA binding protein Hangover associates with chromatin and regulates transcription	32
Li, Huiwen	Linker Histone Functions in Regulating mESC Chromatin Structure and Transcriptome.....	33
Liefke, Robert	Gene Regulatory Mechanisms Mediated by a Novel Class of CpG-Island Binding Proteins.....	34
Likhodeeva, Mariia	Structural and biochemical study of the chromatin remodeler INO80 interaction with nucleosomal arrays	35
Ling, Xiao	Exploring the Synergistic Efficacy and Mechanism of Paclitaxel and Mps1 Inhibitor	36
Matheshwaran, Saravanan	Role of SWR1 Chromatin Remodeler in morphogenesis and Virulence of Ustilago maydis	37
Mazumder, Agnisrota	Beyond heterochromatin spreading: Unraveling the intricate regulation of fission yeast subtelomeric heterochromatin domains	38
Mermoud, Jaqueline	Chromatin Remodelling in fingerprint formation	39
Özdemir Aygenli, Bihter	Functional Characterization of the E3 Ubiquitin Ligase UHRF1	40
Padeken, Jan	UV-Damage-induced Heterochromatin Silencing mediates Organismal Resilience in Aging.....	41
Patsis, Panos	Dissecting the regulatory mechanisms of the histone H3 lysine 9 methyltransferase Clr4.....	42
Pires, Vanessa Borges	Towards in vitro reconstitution of DNA-end resection of DANN double-strand breaks (DSBs) on chromatin.....	43
Rabuffo, Claudia	Inter-chromosomal transcription hubs shape the 3D genome architecture of African trypanosomes	44

Numbers indicate assigned location in poster exhibition.

6th International Munich Chromatin Symposium, October 9-11, 2024

Rappold, Sabrina	The role of VPS72/YL1 in nuclear reassembly	45
Resa, Rifat	Roles of H3.V, H4.V and TbScc1 in Genome Organization of <i>T. brucei</i>	46
Rezende Pabst Fernanda	Investigating the role of metabolic enzymes in heterochromatin regulation	47
Rodrigues de Paula, Diego	Impact of butyric, propionic, and crotonic acids on histone non-common post-translational acylations in colon cancer cell lines	48
Russo, Angela	Novel Insights into ERV regulation: dynamic interplay between heterochromatin and transcriptional activators	49
Sachs, Janine	Investigating the role of gene localization for transcriptional regulation	50
Shakoor, Huma	The role of SSM in Staufen dimerization, structure and mRNA binding	51
Sharma, Manmohan	Recognition and remodeling of Nucleosome and Hexasomes by the human INO80 complex	52
Siddharthan, Rahul	Deep learning for sequence classification: a convolutional neural network that achieves high accuracy	53
Soshnikova, Nataliya	Chromatin remodeling complex PBAF with different PHF10 isoforms specify the transcription of different genes	54
Sotelo-Parrilla, Paula	PLK1-Mediated Phosphorylation Cascade Activates Mis18 Complex to Ensure Centromere Inheritance	55
Starokadomska, Oleksandra	mTOR regulates secretory capacity at transcriptional level in response to nutrient intake	56
Stumberger, Gabriela	Nanoscopy of multiway promoter-enhancer topologies	57
Tian, Ruifang	Elucidating the Landscape and Functional Dynamics of Extracellular Vesicles in CIN-induced senescence.....	58
Vigneau, Jeromine	Chromatin Evolution in Brown Algae	59
Yakovenko, Iryna	Telomere validation reveals unknown behavior of hyperactive Tn5 transposase regarding telomeres and subtelomeres.....	60
Zaratiegui, Carole	Mitochondrial stress contributes to the 3D chromatin alterations induced by mutating the chromatin reader MRG-1	61
Zou, Xinchun	Transcriptional initiation dynamics in macrophages for response to external triggers.....	62
